

MOLECULAR SERVICES

BioServe's DNA Sequencing facility provides automated Sanger Sequencing using BI - Genetic Analyzers

Full- Service Sequencing Include

- Sequencing of PCR Products
- Sequencing from extracted DNA
- Primer Walking
- Bacterial species identification by 16s RNA Sequencing
- End & cDNA library sequencing
- Fungal species identification from culture
- DNA barcoding services for plants/animals

Key Benefits We Offer

- Rapid turnaround
- Long read lengths
- Success rate greater than 95%

Additional Services

- Blast search
- Contig assembly
- Gene annotation
- Editing of raw sequencing data
- Comparison to known sequence
- Fragment analysis
- SNP detection

We Accept Sequencing Samples as

- Plasmids, Phase DNA
- Stab culture
- Glycerol stocks
- Agar plates
- Purified or unpurified PCR samples
- Ready to run plate
